

tefrared

PRODOTTO NATURALE

RED GRANULATE

Mineral aggregate, fire resistant, phonetic-absorbent
and thermo-insulating ideal for

COVERING AND DECORATIVE FOR FLOWER POTS

tefrared

PRODOTTO NATURALE

GARDENING

MINERAL AGGREGATE, FIRE RESISTANT, PHONETIC-ABSORBENT AND THERMO INSULATING, THANKS TO ITS GREAT RED COLOR IS PARTICULARLY INDICATED FOR MAKE MULCH, DECORATIVE FOR FLOWER POTS, GREEN TERRACE, GARDENS AND ROOF-GARDENS.

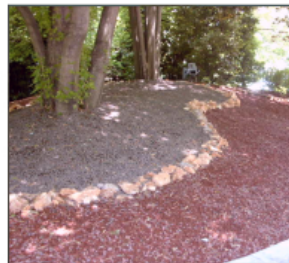

• Technical characteristics

Tefrared is a natural product deriving from the shattering and screening of particular volcanic lava characterized by high porosity and structural resilience. Each granule of **Tefrared** has between the 40% and 60% of empty space, thus it can be utilized in all those fields that need a light lapidary aggregate with high phonetic-absorbent and thermo-insulating power. **Tefrared** is ice resistant, chemically inert, insoluble, odorless, poisonous less and free of reactive silica, organic pollutants and water bloated minerals. **Tefrared** is high temperature resistant (up to 900 °C) and ignitable. **Tefrared** thanks to its chemical composition, draining and humidity regulation properties is an excellent support for green areas, green terraces and floral nurseries.

Aggregate grading: 5/10 - 10/18
Aggregate bulk density: 800 kg/m³
Crush resistance (UNI7549/7): 25/35 N/mm²

• Chemical composition

SiO ₂	Al ₂ O ₃	Fe ₂ O ₃	CaO	MgO	K ₂ O	Na ₂ O
48,8%	16,9%	7,8%	9,8%	4,2%	8,6%	1,8%

BAG
25 Kg.

PALLET
1,5 Ton.

BIG BAG
1.0 / 1.5 m³

Tefrared is available in bags of 25 kg. Packaging is made according to the actual normative concerning workers' health and safety (D.Lgs. 626/94). Bags are packed on 1,5 tons pallets. **Tefrared** is also available on Big Bags of 1.0 or 1.5 m³.
